The selfish monkey

Long ago, the turtle and the monkey are very good friends.

Then, while they were walking together, they saw a banana tree.

The monkey and the turtle agreed right away that they would divide the planted banana tree.

Then, they cut the banana tree into halves.

The monkey took the part with leaves and he gave the bottom part of the banana tree to the turtle.

Many days after, the banana that the monkey planted died.

But the banana planted by the turtle bears fruits. When the monkey saw the bananas, he climbed right away. He ate all the ripened bananas on top of the banana tree.

The turtle got very mad. Because of his anger, he put some thorns on the stem of the banana tree.

When the monkey came down, he was pierced by the thorns that the turtle placed. The turtle just laughed at him.
